

PARTNER Tool

COMMUNITY HEALTH ACTION TEAM

OCTOBER 9, 2013

Program to Analyze, Record, and Track Networks to Enhance Relationships

2

- **PARTNER is a Social Network Analysis Tool to Collect, Analyze, & Interpret Data to Improve Collaboration within Community Networks**
- **Sponsored by Robert Wood Johnson Foundation**
- **Designed for use by collaboratives/coalitions to demonstrate how members are connected, how resources are leveraged and exchanged, the levels of trust, and to link outcomes to the process of collaboration**

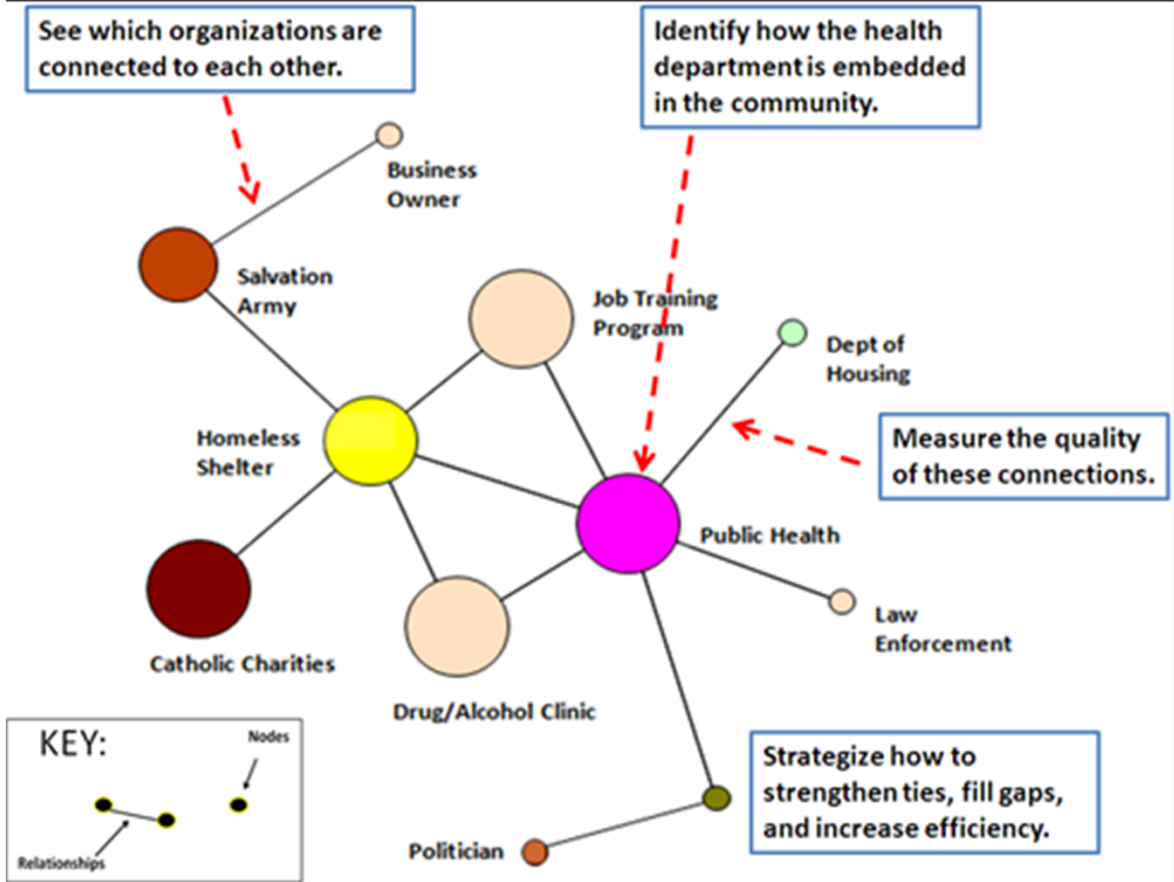

Analyzes Relationships

3

- Create visuals to see who is connected to whom.
- Assess network scores, the trust between partners, the value that each partner brings to the larger collaborative, and assessments of the roles that each member of the collaborative play based on how they are connected to others.
- **Assess outcomes measures to indicate process and products achieved as a result of collaborating across sectors.**

Partnerships and Collaboration

4

How it Works

5

- One person is designated as the “Manager”. This person will identify who will be asked to participate in the survey and is responsible for data management.
- Members of the collaborative answer surveys online.
- The Manager stores the data and imports it into the PARTNER tool.
- Together, the Manager and members of the collaborative discuss results and next steps.

The Data

6

- Identification of partners within the collaboration.
- Record of the frequency of interactions.
- Elements of the strength and quality of the interactions.
- Measures of trust and value within the collaboration.
- Network scores to report and illustrate changes to collaboration activity over time.
- Outcomes measures related to success of the collaborative, products and programs developed, and change to relationships among members of the collaborative are provided.

How can you help?

7

- You will be contacted by the PARTNER Manager
- Complete and return the online survey
- To obtain a comprehensive analysis of the collaboration; all members are asked to participate
- That's it!
